Evergreen Elementary will be implementing DORA and DOMA, diagnostic reading and math assessment programs offered online by Let's Go Learn, Inc. The DORA (Diagnostic Online Reading Assessment TM) and DOMA Diagnostic Online Math Assessment TM) allows teachers to efficiently and effectively assess their students to provide individual information about the reading and math abilities of your child.

DORA and DOMA are intelligent assessment systems which adapt the difficulty of the items according to each student's performance on the assessment to help target his/her accurate reading and math abilities and to help him/her feel successful throughout the assessment process. Once your child completes an assessment, a comprehensive quantitative and qualitative narrative report of your child's profile is instantly generated. Each report offers valuable information about how to help improve your child's reading and math skills. This information will help us provide better-individualized instruction for your child and to monitor the progress he/she makes throughout the year.

Ian Davoll,  
Student Reporter

This summer, Mrs. Przybylski went to Tanzania Africa as a United States delegate. She was involved in a professional artist exchange and taught lessons to artists and learned new artistic techniques. She had an opportunity to visit many places and cities. She had a chance to help the needy women and children. In October, some of the Tanzanian artists visited Evergreen Elementary. They sang traditional African songs and wore handmade jewelry and clothes.
